By Elementary Sloyd is meant bench work in wood, in two dimensions adapted to children from eight to twelve years of age. In 1889 I published a series of working drawings for Preliminary Sloyd with a teachers Sloyd Manual of Working Directions. The changes and improvements made since that time are the results gained from the experience of many teachers, and are embodied in the course here outlined. It is thought by some that children under twelve years of age have not the requisite strength and maturity to handle ordinary wood-working tools, but, owing to the recognized necessity of providing for the vigorous muscular activity of younger children, this course is suggested. I have endeavored to select larger objects than those commonly given children at this age, so that they may obtain more physical exercise, and, although a good finish should be insisted upon, less accuracy is required. The objects are chosen with special reference to the interests of a. child at this age, and are different from those which have been suggested for the three upper grammar grades. This course may include toys and games which appeal to young children. Many of the objects in this course have been evolved after a careful study of a large variety of children s original work in wood.
