The area of $p = a \cos 30$, from o to Jjr , is $Viffi$. 14. Show that the area of $p--a (\sin 28-f-\cos 26)$, from o to zn , is $ita1$. 15. The area of $p \cos 0--a \cos 26$, from o to it , is $i(2--Jff)aJ$. 163. We come now to consider the area generated by a straightline segment which moves in a plane, under certain general conditions. In rectangular coordinates we. have considered the area generated by the moving ordinate to a curve. In polar coordinates the area considered was generated by a moving radius vector. In the former case the generating line moves parallel to a fixed direction, in the latter it passes through a fixed point. A point Q is taken on the tangent at P to a given curve PP , such that $PQ--t$. To find the area bounded by the given curve, the curve QQ described by Q , and two positions PQ , $P Q$ of the generating line. the angle AO . Draw the chord PP and the circular arcs QM , $Q M$ with $/$ as a center. Then $A A$ is equal to the area of the circular sector QIM , plus a fraction of the area of the triangle PIP , plus a fraction of the area $QM Q M$.
