RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 58 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1892 Excerpt: . . . for 60 evenings in the winter. The Leibel Mills alone, with accumulators, would run the private supply (2500 glow lamps). The mains all go to the chief switch-board in the waterworks, so that one man can regulate them; besides this, a man is required for the machines in the waterworks or the pumping station, and later on, when complete, another for the Leibel Mills. The dynamos I. and II. (Plate XVIII. , Fig. 8) are in series, and connected to the mains through the switches (Uj. ) and (U2. ); if required, the machines III. and IV. , driven by the gas engines, can be substituted. These last two machines supply the theatre. Hb H, Fig. 8, are the supply mains. In the Town Hall there is a small battery of 60 accumulators, charged from the dynamo (1). When extended, there will be another dynamo (v)...

### Reviews

*This book will be worth getting. Better then never, though i am quite late in start reading this one. Its been written in an extremely basic way which is only right after i finished reading this book through which actually altered me, alter the way i believe.*

-- **Mr. Enrico Lesch**

*The ebook is straightforward in read easier to recognize. It is actually writter in basic phrases and not difficult to understand. You can expect to like just how the author compose this book.*

-- **Camilla Kub**
