The operations in United States money present no difficulty to pupils who have a knowledge of decimal fractions. When United States money is taught before decimals, the pupil? should be made familiar with the first three decimal orders--tenths, hundredths, and thousandths. This can be done in one or two lessons by the method sketched on page 69. When pupils can read any decimal composed of one, two, or three orders, and have learned that cents are hundredths of a dollar, and mills thmisandths, they will readily understand why cents occupy the first two decimal orders and mills the third. The separatrix between dollars and cents corresponds with the decimal point. The reduction of United States money may be taught as an application...
